RE: Snow Removal from Sun Rivers Community Roadways

With 2-4 cm of snowfall expected tomorrow, we want to remind everyone about the snow removal process for the community.

Our snow removal contractors have been directed to plow the roadways in the most efficient and effective manner to allow them to clear the snow and/or apply ice melt to the roadways in a timely fashion.

Snow will be plowed from the center of the lane to the curb with respect to the flow of traffic. This is similar to the snow removal process in other municipalities, such as the City of Kamloops.

Service Levels

Our goal is to allow the crews to pay the most attention to arterial roads first, as they have the highest volume of traffic and we need to keep them clear for emergency vehicles. These roadways include:

- Sun Rivers Drive
- Sun Rivers Drive West
- Rosewood Drive
- Ironwood Drive
- Canyon Ridge Drive
- Sillaro Drive
- Trillium Drive (due to the grades on that roadway)

Other roadways will receive secondary priority, especially during extreme snowfalls. This does not affect the level of service provided, with respect to having the snow removed from the roadways.

Clearing Snow from Driveways

We recommend waiting until the plows have finished plowing your street before clearing your driveway.

Pile snow on the left side of your driveway (when facing your property). This will allow you to see oncoming traffic, and when the roadway is plowed again it won't push your shoveled piles back into your driveway.

Note that pushing snow from your driveway into the roadway is NOT permitted, which helps ensure potential hazardous situations are avoided.

Driving Safety

Make sure to adjust your driving according to the weather conditions. Please be reminded that the posted speed limit in Sun Rivers is 30 km/hr.

Questions or concerns?

If you have any questions or concerns, contact our local office at 250-377-7757.
